

DOL Launches Online Tool to Improve Federal Contract Reporting

Today, the U.S. Department of Labor (DOL) launched an [online portal](#) to help contracting officers, contractors and subcontractors to provide required notices of federal construction contracts and subcontract awards.

[Executive Order 11246](#), a legal authority enforced by the department's Office of Federal Contract Compliance Programs, requires contracting officers and contractors to submit a notice to OFCCP within 10 working days of the award of a federal or federally assisted construction contract or subcontract that exceeds \$10,000.

According to DOL, the Notification of Construction Contract Award Portal provides users with a more efficient and secure way to submit required information about contract awards, including the contract's effective date.

The portal will be the primary source for entering, tracking and submitting contract award notifications for OFCCP review. The site is designed to reduce or eliminate the need to submit contract award notifications by mail or email. [Access the portal and learn more.](#)
