

Congress Passes Stopgap Measure to Avert Government Shutdown

Yesterday, Congress passed a short-term continuing resolution (CR) to fund the federal government at existing levels into March. The bill funds the Food and Drug Administration, military construction, veterans benefits, transportation, housing, urban development, agriculture and energy and water programs through March 1 and all other programs through March 8. Congress will continue to try to negotiate a long-term appropriations bill over the next six weeks. NDA will continue to advocate for the demolition industry's priorities in any long-term appropriations bill passed by Congress.
